Deadline for manuscript
submissions:

31 December 2020

Message from the Guest Editors

Dear Colleagues,

Earth observation networks, e.g., in-situ sensors and remote sensing systems, deliver a multitude of data that capture the state of our environment. These datasets are highly valued by scientists and stakeholders from a variety of domains and backgrounds such as hydrology, marine sciences, traffic management, environmental monitoring, energy supply, or smart city systems.

An active research and development community is working on new approaches to share, manage, discover, analyze, and visualize geospatial sensor data. This Special Issue, along with the Geospatial Sensing Conference (<https://52north.org/geospatialsensing2020>) held in 2020, provides a platform for scientists, developers, and users to examine current challenges, present best practices, and discuss future developments. While selected presentations from the conference will be featured in this Special Issue, we invite anyone engaged in any work related to the theme of “Geospatial Sensing – from Sensing to Understanding our World” to submit a manuscript for publication. This issue is dedicated but not limited to the selected papers of this conference.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Wolfgang Kainz

Cartography and Geographic Information Science, Department of Geography and Regional Research, University of Vienna, Universitätsstr. 7, A-1010 Vienna, Austria

Message from the Editor-in-Chief

The *ISPRS International Journal of Geo-Information* invites you to submit research articles, reviews, and reports covering topics of the whole domain of geo-information. Although the journal was only founded in 2012, it has already achieved wide recognition in the scientific community. We are proud that since April 2015, our journal is indexed by the SCIE of the Web of Science. As Editor-in-Chief, I encourage you to consider *IJGI* for your scientific papers and would be pleased to welcome you as authors.

Author Benefits

Open Access:—free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: The journal is covered by **Science Citation Index Expanded** (Web of Science), Scopus and INSPEC (IET).

CiteScore (2019 Scopus data): **3.8**, which equals rank 28/95 (Q1) in the category 'Earth and Planetary Sciences (miscellaneous)', rank 99/679 (Q1) in 'Geography, Planning and Development', and rank 13/40 (Q3) in 'Computers in Earth Sciences.'
